## SPECIFICATION CONTROL DRAWING

## MATERIALS

1. INSULATION SLEEVE: Heat-shrinkable, transparent blue, radiation cross-linked modified polyvinylidene fluoride.
2. MELTABLE RINGS: Thermally stabilized thermoplastic. Color: natural.
3. CRIMP BARREL: Tin plated copper alloy. Color: see table.

## APPLICATION

1. These controlled sealing systems are designed to make an immersion resistant multi-wire in-line splices made with wires having tin or silverplated conductors and insulations rated for at least $+125^{\circ} \mathrm{C}$.
2. Parts may be used to splice up to 5 wires having an insulation less than $\varnothing 2$ ( 0.078 ) or up to 10 wires ( 2 per hole) with insulation less than ø1 (0.039).
3. Temperature range: $-55^{\circ} \mathrm{C}$ to $+150^{\circ} \mathrm{C}$.
4. For assembly instruction, see Raychem Installation Procedure RPIP-826-00.
