ZEN-SOFT01-V4 ZEN Support Software OPERATION MANUAL

Cat.No.Z184-E1-03

ZEN-SOFT01-V4 ZEN Support Software Operation Manual

Printed in January 2006

Preface

OMRON products are manufactured for use according to proper procedures by a qualified operator and only for the purposes described in this manual.

This manual describes the functions, performance, and application methods needed for optimum use of the ZEN Programmable Relay.

The ZEN is a compact and highly functional controller that can be used to easily automate small-scale applications. Its development has drawn on OMRON's advanced control technology and expertise in manufacturing various types of controllers.

Before using the ZEN, read this manual carefully so that you can use the ZEN correctly. Keep the manual close at hand so that you can refer to it whenever necessary.

Notice

- (1) All rights reserved. No part of this manual may be reprinted or copied without the prior written permission of OMRON.
- (2) The specifications and other information in this manual are subject to change without notice for product improvement.
- (3) Considerable care has been taken in the preparation of this manual; however, OMRON assumes no responsibility or liability for any errors or inaccuracies that may appear. In the event that a problem is discovered, please contact one of the OMRON offices or agents listed at the end of the manual, and provide the catalog number shown on the cover of the manual.

Warranty and Application Considerations

Read and Understand this Manual

Please read and understand this manual before using the product. Please consult your OMRON representative if you have any questions or comments.

Warranty and Limitations of Liability

Warranty and Limitations of Liability

WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall the responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

Application Considerations

Application Considerations

SUITABILITY FOR USE

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the products.

At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

- Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this manual.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCTS ARE PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

PROGRAMMABLE PRODUCTS

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

Disclaimers

Disclaimers

CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons.

It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the products may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased products.

DIMENSIONS AND WEIGHTS

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

PERFORMANCE DATA

Performance data given in this manual is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

ERRORS AND OMISSIONS

The information in this document has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.

Copyright and Copy Permission

Copyright and Copy Permission

COPYRIGHT AND COPY PERMISSION

This document shall not be copied for sales or promotions without permission.

This document is protected by copyright and is intended solely for use in conjunction with the product. Please notify us before copying or reproducing this document in any manner, for any other purpose. If copying or transmitting this document to another, please copy or transmit it in its entirety.

OMRON Product References

All OMRON products are capitalized in this manual. The word "Unit" is also capitalized when it refers to an OMRON product, regardless of whether or not it appears in the proper name of the product.

© OMRON, 2003

Software License Agreement

Note Read this Agreement prior to using the software.

This software (hereafter called the "Software") shall be used only after the user (hereafter called the "User" and referring to either individuals or companies) has agreed to the following conditions for usage (hereafter called the "Agreement"). This Agreement is a legal contract that is formed between the User and OMRON Corporation (hereafter called "OMRON"). The act of installing, copying, or using the Software shall imply that the User agrees to the items of this Agreement. In the event that the User does not agree to the items of this Agreement, OMRON shall not grant the right for the User to install, copy, or use the Software.

- In this Agreement, Software means the computer program and related documentation contained in the package of this program. Copyright of the Software remains the sole property of OMRON or the third party who has licensed the Software to OMRON and shall not be assigned to the User under this Agreement.
- 2. OMRON grants the User a non-exclusive, non-transferable, and limited license to use the Software on one or more computer(s) owned by the User.
- 3. The User shall not sub-license, assign, nor lease the Software to any third party without prior written consent of OMRON.
- 4. The User may copy the Software for backup purposes only. The User may not decompile, reverse engineer, nor otherwise attempt to discern the source code of the Software.
- 5. The user acknowledges that the software is provided on an as is basis and there are no warranties, expressed or implied, including but not limited to, warranty of merchantability or fitness for particular purpose. In no event, will OMRON be liable for any direct, indirect, incidental, special, or consequential damages arising out of this agreement or use of the software.
- 6. If the User breaches this Agreement, OMRON may terminate this Agreement upon notice to the User. In that event, the User shall return the Software and all copies thereof.

Revision History

A manual revision code appears as a suffix to the catalog number on the front cover of the manual.

- Revision code

The following table outlines the changes made to the manual during each revision. Page numbers refer to the previous version.

Revision code	Date	Revised content
01	May 2003	Original production
02	August 2005	Modifications and additions for Version 3.0 of the ZEN system software and Version 4.0 of the ZEN support software. Applicable models: ZEN-10C3 R-D-V2
03	January 2006	Modifications and additions for Version 3.0 of the ZEN system software and Version 4.1 of the ZEN support software including the following: Added 8-digit counters, 8-digit comparators, and event relays. Added twin timers. Added multiple-day operation and pulse-output operation for weekly timers. Added daylight saving time settings for Australia and New Zealand. Added RS-485 communications settings for models with communications. Deleted contrast control settings. Modified and added to warranty and safety information.

About this Manual

This manual describes the installation and operation of the ZEN-SOFT01 ZEN Support Software and includes the sections described below.

Please read this manual carefully and be sure you understand the information provided before attempting to install or operate the ZEN Support Software. Be sure to read the precautions provided in the following section.

Precautions provides general precautions for using the ZEN Support Software and related devices.

Section 1 describes how to install and start the ZEN Support Software. The screen configuration is also explained, along with the submenus for the Menu Bar, Toolbar, and Status Bar

Section 2 describes how to create, save, edit, and print ladder programs

Section 3 describes how to connect to the ZEN and how to transfer programs between the ZEN and the ZEN Support Software

Section 4 describes the ZEN system settings, how to set passwords to protect the ZEN ladder programs, and how to clear the ZEN memory

Section 5 describes the simulation function, which can be used to simulate ladder program execution without downloading the program to the ZEN.

Section 6 describes errors that may occur while using the ZEN Support Software and possible countermeasures.

The following two manuals are provided for the ZEN Programmable Relays. Refer to them as required in operation.

Manual	Contents	Cat. No.		
ZEN Programmable Relays Operation	The ZEN specifications, functions, and operating	V1 or Pre-V1 CPU Units	Z183	
Manual	methods.	V2 CPU Units	Z211	
ZEN Programmable Relays Communications Manual	The ZEN-10C4 communications functions and operation.	Z212		
ZEN Support Software Operation Manual	Installation and operating procedures for the ZEN Support Software	Z184		

Note On the ZEN Support Software displays, bits in ZEN memory are called "relays," program input bits are called "contacts," and program output bits are called "coils."

WARNING Failure to read and understand the information provided in this manual may result in personal injury or death, damage to the product, or product failure. Please read each section in its entirety and be sure you understand the information provided in the section and related sections before attempting any of the procedures or operations given.

Visual Aids

The following headings appear in the left column of the manual to help you locate different types of information.

- **Note** Indicates information of particular interest for efficient and convenient operation of the product.
- **1,2,3...** 1. Indicates lists of one sort or another, such as procedures, checklists, etc.
- **Precaution** Indicates precautionary information that should be heeded in using the ZEN.

PRECAUTIONS

This section provides general precautions for using the ZEN Support Software for the ZEN Programmable Relays.

The information contained in this section is important for the safe and reliable application of the ZEN. You must read this section and understand the information contained before attempting to set up or operate a ZEN.

1	General Precautions	vi
2	Safety Precautions xv	vi
3	Application Precautions	vii

1 General Precautions

The user must operate the product according to the performance specifications described in the operation manual.

1

Before using the product under conditions which are not described in the manual or applying the product to nuclear control systems, railroad systems, aviation systems, vehicles, combustion systems, medical equipment, amusement machines, safety equipment, and other systems, machines, and equipment that may have a serious influence on lives and property if used improperly, consult your OMRON representative.

Make sure that the ratings and performance characteristics of the product are sufficient for the systems, machines, and equipment, and be sure to provide the systems, machines, and equipment with double safety mechanisms.

This manual provides information for installing and operating OMRON Motion Control Units. Be sure to read this manual before operation and keep this manual close at hand for reference during operation.

WARNING It is extremely important that a PC and all PC Units be used for the specified purpose and under the specified conditions, especially in applications that can directly or indirectly affect human life. You must consult with your OMRON representative before applying a PC system to the above mentioned applications.

2 Safety Precautions

Confirm safety before attempting any of the following operations.

- · Transferring the user program
- · Changing the user program
- · Changing the operating mode of the ZEN
- · Turning relays ON or OFF

Always perform a program check on any program after writing it and before transferring it to the ZEN. Also confirm the operation of the program completely before using it for actual system operation.

Always disconnect the output circuits before performing operating tests on systems in which the loads connected to the output circuits can have a serious effect on human life or property if incorrect operation occurs.

3 Application Precautions

Observe the following precautions when using the ZEN Support Software.

- Observe the following precautions before starting the ZEN Support Software
 - Close all software programs not related to the ZEN Support Software. It is particularly important to close all programs that start periodically or intermittently, such as screen savers, virus checkers, email and other communications programs, and schedulers.
 - Do not share hard disks, printers, or other devices with other network computers while running the ZEN Support Software.
 - Some notebook computers set the RS-232C port to modem or infrared application by default. Change the settings according to the operating instructions for your computer so that the RS-232C port can be used as a normal serial communications port.
 - Some notebook computers set the RS-232C port to not supply power (5 V) to the port to save energy by default. Change the settings according to the operating instructions for your computer to provide power to the port. (There are Windows settings and also possibly settings for computerspecific utilities or BIOS settings to save power.)
- Do not turn OFF the power supply to the ZEN or disconnect the connecting cable while the ZEN Support Software is online with the ZEN. The computer may malfunction.

SECTION 1 Installation and Startup

This section describes how to install and start the ZEN Support Software. The screen configuration is also explained, along with the submenus for the Menu Bar, Toolbar, and Status Bar.

1-1 Before Operation

1-1-1 Product Contents

Check that the package for the ZEN Support Software (ZEN-SOFT01-V4) contains one CD-ROM setup disk.

1-1-2 Compatible Computers

The following table shows the computers that support the ZEN Support Software.

ltem	Conditions
Operating system	Windows 95, 98, ME, 2000, XP, or NT4.0 Service Pack 3
CPU	Pentium 133 MHz or faster Pentium 200 MHz or faster recommended.
Memory	64 Mbytes or more
HDD	40 Mbytes or more of available disk capacity
CD-ROM drive	Required
Communications	1 serial port (COM port)
Keyboard and mouse	Required
Monitor	800 x 600 dots (SVGA) min., 256 colors min.

1-2 Installing and Uninstalling the ZEN Support Software

1-2-1 Installation

1,2,3... 1. Insert the Setup Disk in the CD-ROM drive of the computer. After a short while the Language Selection Screen will be displayed. Select the required language and click the **Next** Button.

- **Note** If the Language Selection Screen is not displayed when the CD-ROM is inserted, go to *My Computer*, open the *Setup Disk* (*CD-ROM*) icon, and double-click the *Setup.exe* file.
 - If a previous version of the ZEN Support Software is already installed, a confirmation dialog box for file deletion will appear when the CD-ROM is inserted. Click the **OK** Button. The previous version will be deleted and the maintenance completion dialog box will be displayed. Click the **Finish** Button, insert the CD-ROM again, and install the new version of the ZEN Support Software.
 - 2. The Setup Screen will be displayed. Check the details, enter the required information, and click the **Next** Button.

3. When the setup operation has been completed, the following screen will be displayed. Click the **Finish** Button.

1-2-2 Uninstalling the ZEN Support Software

Use the following procedure to uninstall the ZEN Support Software from a computer.

- 1,2,3... 1. Select Settings/Control panel from the Windows Start Menu.
 - Select Add or delete applications from the Windows Control Panel and then select and delete OMRON ZEN Support Software.

1-3 Starting and Quitting

1-3-1 Starting the ZEN Support Software

This section explains the procedure for starting and quitting the ZEN Support Software.

 Select Program/Omron/ZEN Support Software/ZEN Support Software from the Windows Start Menu. After a moment the initial screen will be displayed.

2. When display of the opening screen is finished, the following screen will be displayed. Select *Create a new program* and click the **OK** Button.

- Note a) Click *Load programs from files* and double-click the **OK** Button to open existing ladder programs when starting up the ZEN Support Software. Refer to 2-6-2 *Opening Saved Files* for the rest of the procedure for opening existing ladder programs.
 - b) If uploading a program from the ZEN is selected, the following will be performed automatically.
 - Using the ZEN online function, the contents of the property settings (ZEN model and Expansion I/O Unit configuration) will be read from the ZEN and the settings will be made.
 - The program will be transferred from the ZEN to the computer.
 - The ladder diagram will be displayed.

The Property Settings Screen will be displayed. Enter the ZEN 3. model and configuration (i.e., whether or not Expansion I/O Units are connected), the project name, and a comment and press the OK Button.

2-1 Circuit Diagrams and Ladder Programs

In preparation for creating ladder programs, this section describes the relationship between relay circuits and ladder programs.

2-1-1 Ladder Programs

The ZEN uses ladder programs that appear like relay circuit diagrams.

2-1-2 Basic Configuration of the ZEN Ladder Programs

The ZEN can execute up to 96 lines of programming, with 3 inputs and 1 output per line. Outputs can be specified at the right ends of lines only. Inputs cannot be specified after outputs.

The ladder program inputs and outputs are displayed on the ZEN Support Software screen as shown below.

Ladder Diagram Display

Electrical Circuit Display

Note On the ZEN Support Software displays, bits in the ZEN memory are called "relays," program input bits are called "contacts," and program output bits are called "coils."

2-1-3 Memory Areas

The following table shows the memory areas that can be used in the ZEN ladder programs.

Symbol	Name	Function	Usable as input condition	Usable as output
1	CPU Unit input bits	Correspond to CPU Unit input terminals.	Yes	No
х	Expansion I/O Unit input bits	Correspond to Expansion I/O Unit input terminals.	Yes	No
В	Button input bits	Turn ON/OFF when operation buttons are pressed on the CPU Unit during ZEN operation.	Yes	No
A	Analog comparator bits	Compares present analog values to setting values and outputs the compared results for CPU Units with DC power supply inputs. (The analog input terminals correspond to I4 and I5 in 10-point CPU Units, and to Ia and Ib in 20- point CPU Units.)	Yes	No
Ρ	Timer/counter comparator bits	Compares timer/counter present values and timer/counter present values and settings and outputs the compared results.	Yes	No
G	8-digit comparator bits	Compares 8-digit counter present value to preset value and outputs the compared results.	Yes	No
@	Weekly timers	Turns ON/OFF at the specified day/time	Yes	No

Circuit Diagrams and Ladder Programs

Section 2-1

Symbol	Name	Fund	ction	Usable as input condition	Usable as output
*	Calendar timers	Turns ON/OFF be dates.	etween specified	Yes	No
Q	CPU Unit output bits	Correspond to CPU Unit output terminals.	Can specify Normal output ([), Set (S)/	Yes	Yes
Y	Expansion I/O Unit output bits	Correspond to Expansion I/O Unit output terminals.	Reset (R), or Alternate (A) operation.	Yes	Yes
Μ	Work bits	Bits that can be used in the ladder program.		Yes	Yes
Н	Holding bits	Bits that maintain ON/ OFF status at power interruptions and can be used in the ladder program.		Yes	Yes
т	Timers	(X), OFF delay (■	Timers can be used for ON delay (X), OFF delay (■), One-shot pulse (O), Flashing pulse (F), or Twin (W)		Yes
#	Holding timers	Timers that maint value at power int delay operation o	terruptions. (ON	Yes	Yes
С	Counters	Incremental or decremental counters		Yes	Yes
F	8-digit Counter	Incremental or decremental counter with 8-digit capacity.		Yes	Yes
D	Display bits	Display character day, time, timer/co value, or analog c on CPU Unit LCD	ounter present conversion value	No	Yes

2-1-4 Memory Area Differences between Versions

The following table shows the differences between different models and different versions with respect to the memory areas that can be used.

Symbol	Name	Bit number (See note 1.)						
		ZEN- 20C	ZEN- 10C□□□- □-V2	ZEN- 20C	ZEN- 10C□□- □-V1	ZEN- 10C		
I	CPU Unit input bits	0 to b (12 bits)	0 to 5 (6 bits)	0 to b (12 bits)	0 to 5 (6 bits)	0 to 5 (6 bits)		
Q	CPU Unit output bits	0 to 7 (8 bits)	0 to 3 (4 bits) (See note 5.)	0 to 7 (8 bits)	0 to 3 (4 bits)	0 to 3 (4 bits)		
Х	Expansion I/O Unit input bits (See note 2.)	0 to b (12 bi	ts max.)					
Y	Expansion I/O Unit output bits (See note 2.)	0 to b (12 bits max.)						
М	Work bits	0 to f (16 bit	s)					
Н	Holding bits	0 to f (16 bits)						
В	Button input bits (See note 3.)	0 to 7 (8 bits)						
A	Analog comparator bits (See note 4.)	0 to 3 (4 bits)						
Р	Timer/counter comparator bits	0 to f (16 bit	s)					
Т	Timers	0 to f (16 tin	ners)			0 to 7 (8 timers)		
#	Holding timers	0 to 7 (8 tim	ers)			0 to 3 (4 timers)		
С	Counters	0 to f (16 co	unters)			0 to 7 (8 counter s)		
@	Weekly timers (See note 3.)	0 to f (16 tin	ners)			0 to 7 (8 timers)		
*	Calendar timers (See note 3.)	0 to f (16 timers) 0 to 7 (8 timers)						
D	Display bits (See note 3.)					0 to 7 (8 bits)		
F	8-digit counter	0 (1 counter)					
G	8-digit comparator bits	0 to 3 (4 bits	5)					

- **Note** 1. Bit numbers are specified in hexadecimal (0,1,2,3....9, a, b,...e, f).
 - 2. The bit numbers that can be used depend on the Expansion I/O Unit connection configuration.
 - 3. Supported only by the LCD-type CPU Unit.
 - 4. Supported only by the CPU Units with a DC power supply.
 - 5. Three bits (0 to 2) for CPU Units with Communications.

2-2 Inputting Ladder Programs

This section describes how to input the following simple program using the ZEN Support Software.

Example Ladder Program

 1. If the ZEN Support Software has not been started, select *Programs/Omron/ZEN Support Software/ZEN Support Software* from the Windows Start Menu. Select *Create a new program* and press the OK Button.

ZEN Support Software	×
Create a new program	OK
O Load programs from files	Cancel
C Read program from ZEN	

If the ZEN Support Software has already been started, click the **New** Button on the Toolbar. Alternatively, select *File(F)/New(N)* from the Menu Bar.

 The Property Settings Screen will be displayed. Enter the ZEN type, configuration (i.e., Expansion I/O Units), project name, and comment, and then click the **OK** Button.

Property Settings		X
CPU Unit type:	-V2 •	OK]
ZEN types:	10C1A*-A-V2	Cancel
Expansion Unit 1:	No	Help
Expansion Unit 2:	No	
Expansion Unit 3:	No	
Project Name:	New Project	
Comment:		

3. An empty screen in ladder-view format will be displayed. Doubleclick the mouse on the position for the first input condition.

- Note Input positions for input and output bits can be set by using the mouse or cursor keys to move to the input or output position and then use any of the following methods.
 - Press the Enter Key.
 - Double-click.
 - Click the **Insert Input** or **Insert Output** Button on the Toolbar.
 - Select *Insert(I)/Contact (input bit)/Coil (output bit)* from the Menu Bar.
 - Select Edit(E)/Edit(E) from the Menu Bar.
 - Right-click and select Edit.

 The Edit Contact Dialog Box will be displayed. Specify the bit type, type of input, and bit number, and enter a comment if required.

- Note Parameter settings for timers and counters are set on the Edit Contact Dialog Box.
- 5. Double-click the mouse on the next input position.

- Note a) Horizontal connection lines can be drawn by using the mouse or Cursor Keys to move to the connection line position and then use any of the following methods.
 - · Pressing the Key.
 - Click the Insert/Horizontal Button on the Toolbar.
 - Select Insert(I)/Horizontal(H) from the Menu Bar.
 - b) Vertical connection lines can also be drawn by using the mouse or Cursor Keys to move to the connection line position and then use any of the following methods:
 - Press the Key.
 - Click the Insert Vertical Button on the Toolbar.
 - Select *Insert(I)/Vertical(V)* from the Menu Bar. The vertical line will be drawn down from the cursor position.
- 12. The ladder program has now been completed.

13. Double-click in the rung comment area to write rung comments for the ladder program. It is also possible to write comments by first using either the mouse or the cursor keys to move to the rung comment area, and then selecting *Edit(E)/Edit rung comments*.

Note Up to 63 characters can be entered for a rung comment.

2-3 Checking Ladder Programs

2-3-1 Program Check

Select **ZEN(Z)/Program Check** from the Menu Bar and check the program. The following dialog box will be displayed if the program check was completed without finding any errors.

Note For details on error messages during program checking, refer to 6-2 *Program Check Errors and Warnings*.

2-3-2 Display Check

Select **ZEN(Z)/Display Check** from the Menu Bar, and then use the Display Check Dialog Box to check the display contents for the display bits D0 to Df that are used in the program. The contents of

each are displayed in different colors, so overlapping displays can be checked

Click with the mouse to toggle between displaying or not displaying the display contents for each of the display bits D0 to Df.

2-4 **Editing Ladder Programs**

This section describes how to edit existing ladder programs.

Searching for Inputs and Outputs 2-4-1

Click the Find Button on the Toolbar or select Edit(E)/Find(F) from the Menu Bar.

Replacing Inputs 2-4-2

To replace an input, select *Edit(E)/Replace* from the Menu Bar.

2-4-3 Changing Inputs, Outputs, and Settings

Input positions for input and output bits can be changed by using the mouse or cursor keys to move to the input or output position and then use any of the following methods.

- Press the Enter Key.
- · Double-click.
- Click the Insert Input or Insert Output Button on the Toolbar.
- Select Insert(I)/Contact (input bit)/Coil (output bit) from the Menu Bar.
- Select Edit(E)/Edit(E) from the Menu Bar.
- Right-click and select Edit.
- *1,2,3...* 1. For this example, double-click CPU unit output Q0.

2. The Edit Output Dialog Box will be displayed.

Editing Ladder Programs

 Change the bit type in the Edit Output Dialog Box from Q to M (holding bit), specify the function and bit number, and enter a comment if necessary.

2-4-5 Deleting Inputs and Outputs

To delete an input or output, first use the mouse or the cursor keys to highlight the input or output that is to be deleted. Then use any of the following methods.

- Click the Delete Button in the Toolbar.
- Select Edit(E)/Delete from the Menu Bar.
- Right-click and select Delete(D).
- Press the **Delete** Key on the keyboard.
- **1,2,3...** 1. Move the cursor to the input.

2. Click the Delete Button on the Toolbar.

3. The input will be deleted.

Ble Edit Yew Inse	rt ZEN Help				- 03

2-4-7 Editing Connection Lines

Use the following procedure to delete connection lines.

- **1,2,3...** 1. Drag the mouse along the existing line.
 - 2. Use the mouse or Cursor Keys to move to the connection line and then use any of the following methods.
 - Click the Delete Button on the Toolbar.
 - Select Edit(E)/Delete from the Menu Bar.
 - Press the Delete Key on the keyboard.

Use the following procedure to create new connection lines.

- **1,2,3...** 1. Drag the mouse from the desired position to create a new line.
 - 2. Use the mouse or Cursor Keys to move to the desired position for the connection line and then use any of the following methods.
 - Click the Insert Horizontal or Insert Vertical Button on the Toolbar.
 - Select *Insert(I)/Horizontal(H)* or *Insert(I)/Vertical(V)* from the Menu Bar.
 - Press the or I Key on the keyboard.

2-4-8 Copying, Cutting, and Pasting Inputs and Outputs

Inputs and outputs within a specified range can be easily copied and moved if the cut, copy, or paste functions are used.

Copying, Cutting and Pasting Individual Objects

1,2,3... 1. Using the mouse or cursor keys, select the input or output that is to be copied or cut.

2. Use any of the following procedures for copying and moving.

When Copying

- Click the Copy Button on the Toolbar.
- Select *Edit(E)/Copy(C)* from the Menu Bar.
- Right-click and select Copy.

When Moving

- Click the Cut Button on the Toolbar.
- Select *Edit(E)/Cut(T)* from the Menu Bar.
- Right-click and select Cut.

- 3. Any of the following methods can be used to paste inputs and outputs after moving the cursor to desired position with the mouse or cursor keys.
 - Click the Paste Button on the Toolbar.
 - Select Edit(E)/Paste(P) from the Menu Bar.
 - Right-click and select Paste.

	3-7-1	Monitor	48					
	3-7-2	Displaying Present Values	49					
	3-7-3	Changing Settings Online	49					
3-8	Setting a	nd Resetting Inputs	51					
3-9	Clearing Errors							

3-1 Connecting the ZEN and Communications Settings

3-1-1 Connecting to the ZEN

Use a ZEN-CIF01 Computer Connecting Cable to connect the ZEN and a serial port (COM port) of the computer.

Note The connector on the computer side of the ZEN-CIF01 Computer Connecting Cable is a 9-pin D-sub connector. When connecting to a computer that does not have a serial port, connect an RS-232C-USB Conversion Cable to the ZEN-CIF01 Computer Connecting Cable. An OMRON CS1W-CIF31 Conversion Cable can be used (cable length: 50 cm).

3-1-2 Communications Settings for Connecting to the ZEN

Communications settings must be made in the ZEN Support Software before commencing communications with the ZEN.

- **1,2,3...** 1. Select *File(F)/Communications Settings (Computer* ↔ *ZEN)* from the Menu Bar.
 - 2. The Communications Settings Dialog Box will be displayed. Make the settings for each item.
 - a) When using a -V2 CPU Unit

Communications Se	ttings	×
Port Settings Port Name:	COM1	OK Cancel
		Defaults
	Monitor Time	Help

Setting	Details	Default
Port name	Select a COM port that can be connected to the personal computer.	COM 1
Monitor time	Specify the communications monitor time between 1 and 30 s.	2

b) When using a -V1 or earlier CPU Unit.

Communications S	ettings	×
Port Settings – Port Name:	COM1	OK Cancel
		Defaults
Node No.	Monitor Time	Help

Setting	Details	Default
Port name	Select a COM port that can be connected to the personal computer.	COM 1
Node No.	Use 0 for the node number. If the node number is different from the node number of the ZEN, communications will not be possible.	0
Monitor time	Specify the communications monitor time between 1 and 30 s.	2

Specifications Changes from Version 3.0 Support Software Modem-related settings (Modem, Local information, Connect to) that could not be used have been deleted.

 Click the OK Button to save the settings in the project. Click the Cancel Button to discard the settings. Click the Defaults Button to return to the default settings.

3-2 Connecting Online

Check communications with the ZEN before transferring or verifying programs. Connect the computer to the ZEN and perform the check operation with the project file open.

- 1,2,3...
 Select File(F)/Properties from the Menu Bar and make the ZEN model and Expansion I/O Units 1 to 3 settings in the Properties Dialog Box to match the system configuration of the ZEN to be connected online.
 - Turn OFF the ZEN power, connect the ZEN to the computer with the Computer Connecting Cable, then turn ON the ZEN power again.

When using a ZEN that supports external communications, a confirmation message that says, "RS-485 will stop. Y/N" will be displayed on the ZEN when you turn ON the power. Select **Yes**, then click the **OK** Button

 Open the project file. Click the Go Online Button on the Toolbar or select ZEN(Z)/Go Online/Offline(W) from the Menu Bar. A confirmation dialog box will be displayed. Click the OK Button.

4. Check that the Status Bar display has changed from *Offline* to *Online*. The background color for the ladder view area will change to gray when the ZEN is online.

No Error ZEN-10C1**-A Online STOP

Click the **Go Online** Button on the Toolbar again or select **ZEN(Z)/Go Online/Go Offline(W)** from the Menu Bar. The display on the Status Bar will return from *Online* to *Offline*. The background color for the ladder view area will change back to white.

-A Offline

3-3 Transferring Programs to the ZEN

System Software Version: V03.00 (Date: 05/05/20)

This section describes how to transfer ladder programs created using the ZEN Support Software to the ZEN.

The ZEN must be connected and online and the project file opened before the program transfer operation can be executed.

- **Precaution** Perform adequate safety checks before transferring the program to the ZEN.
 - Click the Transfer to ZEN Button on the Toolbar or select ZEN(Z)/ Transfer(R)/Transfer to ZEN(T) from the Menu Bar. The Transfer to ZEN Dialog Box will be displayed. Click the OK Button to transfer the program to the ZEN. Click the Cancel Button to cancel the transfer.

Settings Details

 Select The settings are downloaded too in the Transfer to ZEN Dialog Box to download the ZEN settings in the ZEN Support Software at the same time.

Refer to *4-1 ZEN Settings* for information on the various ZEN settings.

- Select *Protection is set* in the Transfer to ZEN Dialog Box if the ZEN is to be protected by the password set in the ZEN Support Software. Do not select this option if no password has been set. Refer to *4-2 Setting a Password* for information on setting passwords.
- Note 1. With version 4.0 or higher, it is possible to transfer programs to the ZEN even if the Expansion I/O Units are not connected, so long

as the CPU Unit is the same type as that specified in the property settings of the Support Software.

When going online, a confirmation message, such as the example shown below, will be displayed. Select "Y" (yes) to connect, and then perform the transfer operation.

"ZEN model in properties settings (10C1A*-A-V2) does not match model being connected (10C1A*-A-V2+8E1**). Go online? Y/N"

2. Refer to 6-2 Program Check Errors and Warnings for information on error messages that occur during transfer from the computer to the ZEN.

3-4 Transferring Programs from the ZEN

This section describes how to transfer the ZEN ladder programs to the ZEN Support Software.

The ZEN must be connected and online and the project file opened before the program transfer operation can be executed.

1,2,3...
 Click the Transfer From ZEN Button on the Toolbar or select ZEN(Z)/Transfer(R)/Transfer from ZEN(T) from the Menu Bar. The Transfer From ZEN Dialog Box will be displayed. Click the OK Button to transfer the program from the ZEN. Click the Cancel Button to cancel the transfer.

Transfer From ZEN	×
About to upload the program from ZEN. Do you wish to continue?	ок
	Cancel
☑ The settings are uploaded too.	Help

Settings Details

Select *The settings are uploaded too* in the Transfer From ZEN Dialog Box to upload the ZEN settings at the same time.

Note a) If a password has been set for the previously opened project file (see 4-2 Setting a Password), the password will be cleared, and a comfirmation dialog box will be displayed.

ZEN Suppo	rt Software 🔀
•	Program protection has been released.

b) Refer to 6-2 Program Check Errors and Warnings for information on error messages that occur during transfer from the ZEN to the computer.

3-5 Verifying Programs with the ZEN

This section describes how to compare the programs in the ZEN and the ZEN Support Software to verify that they are the same.

The ZEN must be connected and online and the project file opened before the program verification operation can be executed.

Click the Compare with ZEN Button on the Toolbar or select ZEN(Z)/Transfer(R)/Compare with ZEN(C) from the Menu Bar. The Compare With ZEN Dialog Box will be displayed. Click the OK Button to compare the ZEN and the ZEN Support Software programs. Click the Cancel Button to cancel the verification.

Compare with ZEN	×
About to compare the program with ZEN. Do you wish to continue?	ОК
	Cancel
The settings are compared too	
pine country are compared tool	Help

Settings Details

Select *The settings are compared too* in the Compare With ZEN Dialog Box to compare the ZEN and the ZEN Support Software settings at the same time.

2. A confirmation dialog box will be displayed if the verification has been completed normally.

When Programs Are the Same

When Programs Are Different

ZEN Supp	oort Software 🔀	
٩	Verify was successful.	
	OK	

Note Refer to 6-2 Program Check Errors and Warnings for information on error messages that occur during verification.

3-6 Operating and Stopping the ZEN

This section describes how to operate and stop the ZEN from the ZEN Support Software.

The ZEN must be connected and online and the project file opened before these operations can be executed.

- **Precaution** Perform adequate safety checks before changing the operating mode (RUN/STOP).
 - **1,2,3...** 1. Select *ZEN(Z)/Change operating mode(M)/RUN(R)* from the Menu Bar.
 - 2. Check that the Status Bar display changes from STOP to RUN.

p Error ZEN-10C1**-A Online STOP

 Select ZEN(Z)/Change operating mode(M)/STOP(S) from the Menu Bar to stop ZEN operation. The Status Bar display will change from RUN to STOP.

a Error ZEN-10C1**-A Online STOP

3-7 Monitoring Programs

o Error

3-7-1 Monitor

This section describes how to monitor programs being executed by the ZEN.

The ZEN must be connected and online and the project file opened before the programs can be monitored. The ZEN and the ZEN Support Software programs must be the same before programs can be monitored. Use the procedures outlined under 3-3 *Transferring Programs to the ZEN* (page 45), 3-4 *Transferring Programs from the ZEN* (page 46), and 3-5 *Verifying Programs with the ZEN* (page 47) to transfer and verify the programs.

1,2,3...
 1. Use the procedure outlined under 3-6 Operating and Stopping the ZEN (page 48) to start ZEN operation. Check that the Status Bar display changes from STOP to RUN.

ZEN-10C1**-A Online STOP

 Click the Toggle Monitoring Button on the Toolbar or select ZEN(Z)/Monitor(O) from the Menu Bar. 3. When the mode is changed to MONITOR, the closed circuits of the ZEN ladder program are highlighted in green.

Test Project 00.zen				_ 🗆 🗙

3-7-2 Displaying Present Values

Present values, the ON/OFF status of inputs, etc., can be displayed during monitoring of programs being executed by the ZEN.

During monitoring, moving the mouse or cursor to a timer/counter or other output will cause the present value to be displayed in the Status Bar.

3-7-3 Changing Settings Online

Set values can be changed while connected to the ZEN online.

- 1,2,3...1. While online, use either the mouse or the cursor keys to highlight the output that is to be changed. Then use any of the following methods to change the setting.
 - Press the Enter Key or double-click.
 - Select Edit(E)/Edit(E) from the Menu Bar.

• Right-click and select *Edit(E)*.

2. The Edit Dialog Box will be displayed. When the settings are changed and the dialog box closed, the changes will be transferred to the ZEN and reflected there.

8-digit counter (F) (See note.)	Counter setting
Weekly timer (@)	Start/stop day of week, time Pulse output time (See note.)
Calendar timer (*)	Start/stop months, days
Analog comparator (A)	Constants, operators

Note The 8-digit counters and pulse output time can be used when using a -V2 CPU Unit.

3-8 Setting and Resetting Inputs

This section describes how to set (turn ON) and reset (turn OFF) the ZEN bits from the ZEN Support Software.

The ZEN must be connected and online and the project file opened before inputs can be set or reset. Also, the ZEN and the ZEN Support Software programs must be the same before inputs can be set or reset. Use the procedures outlined under 3-3 *Transferring Programs to the ZEN* (page 45), 3-4 *Transferring Programs from the ZEN* (page 46), and 3-5 *Verifying Programs with the ZEN* (page 47) to transfer and verify the programs.

- **Precaution** Confirm safety before turning relays ON or OFF.
 - **1,2,3...** 1. Use the procedure outlined under *3-6 Operating and Stopping the ZEN* to start ZEN operation. Check that the Status Bar display changes from *STOP* to *RUN*.

D Error ZEN-10C1**-A Online STOP

- 2. Use the procedure outlined under *3-7 Monitoring Programs* to change to MONITOR mode.
- 3. Use the mouse or cursor keys to move to the input that is to be set or reset, and then perform either of the following operations:
 - Select ZEN(Z)/Set/Reset Operation and then either Set Operation(W) or Reset Operation(F) from the Menu Bar.
 - Right-click and then select **Set/Reset Operation** and then either **Set Operation(W) or Reset Operation(F)**.
- Note The following table shows the inputs that can be set or reset.

Bit type	Comments
CPU Unit input bits (I)	Input terminal ON/OFF status has priority.
CPU Unit output bits (Q)	Set/reset possible for inputs only. (Not possible for outputs.)
Expansion I/O Unit input bits (X)	Input terminal ON/OFF status has priority.
Expansion I/O Unit output bits (Y)	Set/reset possible for inputs only. (Not possible for outputs.)
Work bits (M)	
Holding bits (H)	

3-9 Clearing Errors

If an error occurs, use the following procedure to clear the error and then remove the cause of the error.

The ZEN must be connected and online for this operation.

- 1,2,3... 1. Select ZEN(Z)/Error Clear from the Menu Bar to clear the error.
 - 2. Repeat this step to clear multiple errors.
 - Note a) Refer to Section 6 Troubleshooting in the ZEN Operation Manual (Z183) for information on ZEN errors.
 - b) ZEN errors that occur while online will be displayed in the Status Bar.

No Error	ZEN-10C1**-A	Online	STOP	//,
Error display				

SECTION 4 System Settings

This section describes the ZEN system settings, how to set passwords to protect the ZEN ladder programs, and how to clear the ZEN memory.

 - b) Input filters can be set only for Expansion I/O Units that exist in the system configuration.
 - c) Do not change these settings. They are for future functional expansions.

- Click the OK Button to save the settings. Click the Cancel Button to discard the settings. Click the Initialization Button to return to the default settings.
- 4. Settings can be sent between the ZEN and the ZEN Support Software if the ZEN is online. Click the **Transfer to ZEN** Button to transfer the settings to the ZEN or the **Transfer from ZEN** Button to transfer the settings from the ZEN to the ZEN Support Software. Press the **Compare with ZEN** Button to compare the settings on the computer and the ZEN.

4-1-2 Time Settings

With the LCD-type CPU Units, time and date settings are preformed online.

- 1,2,3...Select ZEN(Z)/Set Protection(E)/Time Setting(T) from the Menu Bar.
 - 2. The Time Settings Dialog Box will be displayed. Set the date and time for the ZEN internal clock.

Time Se	ttin	JS			×
_ ZEN	Inte	rnal Clock-			OK
D	ate	January	01,2000	*	Cancel
Ti	me	00:14:44		*	
- PC 1	Гime				Synchronization
D	ate	March	08, 2005	*	
Ti	me	17:22:50		* *	

Settings		Details
ZEN internal	Date	Edit the ZEN date. (Date read from the ZEN at startup or same date as computer)
clock	Time	Edit the ZEN time. (Time read from the ZEN at startup or same time as computer)
PC time	Date	Displays the computer date.
	Time	Displays the computer time.

- Note To set the date and time display styles, select **Settings/Control Panel/Regional Settings** from the **Start** menu. Select **Date** to set a date style or **Time** to set a time style (when using Windows 2000).
 - Click the OK Button to send the settings to the ZEN. Click the Cancel Button to discard the settings. Click the Synchronization Button to use the computer date and time as the ZEN date and time. When the Synchronization Button

is clicked, the computer date and time will be shown under the ZEN date and time on the screen, but these settings will not be sent to the ZEN. To transfer the computer date and time to the ZEN, click the **Synchronization** Button and then click the **OK** Button.

4-2 Setting a Password

This section describes how to set a password for the ZEN. This password is used to set and clear protection for the ZEN programs.

- **Note** 1. Refer to *4-3 Protecting Programs* for information on how to set and clear ZEN program protection.
 - 2. When setting a password, be sure to record it. If you forget the password, it will not be possible to set or clear protection for the ZEN program.
- 1,2,3...Select ZEN(Z)/Set Protection(E)/Set Password(T) from the Menu Bar.
 - 2. The Set Password Dialog Box will be displayed. Enter the password and confirm the password.

Set Password		×
New Password:	****	ок
Confirmation Password:	****	Cancel
		Delete Password
		Help

The password can be only 4 digits long.

3. Click the **OK** Button to set the password as entered. Click the **Cancel** Button to clear the entered password. Click the **Delete Password** Button to delete an existing password.

4-3 Protecting Programs

This section describes how to protect the ZEN programs from intentional or unintentional alteration by other users. Protected ZEN programs cannot be altered until the protection is removed and the protection can only be removed if the password is input correctly. For these reasons, care must be taken when using program protection.

The ZEN must be connected and online before program protection can be executed.

- **Note** a) Refer to *4-2 Setting a Password* for information on how to set and change passwords.
 - b) If the password is forgotten, it can only be cleared by performing the ZEN's memory all clear operation (see 4-4 Clearing the ZEN Memory).

4-3-1 Setting Program Protection

- 1,2,3...
 Click the Set Protection Button on the Toolbar or select ZEN(Z)/ Protect(P)/Set(S) from the Menu Bar. The Set Protection Dialog Box will be displayed.
 - 2. Enter the 4-digit password set under the password settings.

ОК
Cancel

3. Once the above procedure has been completed, programs cannot be transferred to or from the ZEN or compared with the ZEN until the protection is removed.

4-3-2 Removing Program Protection

- 1,2,3...
 1. Click the Release Protection Button on the Toolbar or select ZEN(Z)/Protect(P)/Release(L) from the Menu Bar. The Release Protection Dialog Box will be displayed.
 - 2. Enter the 4-digit password set under the password settings.

Release Protection	×
Enter the password.	ОК
****	Cancel

Programs can now be transferred to or from the ZEN or compared with the ZEN.

Note Refer to *6-2 Program Check Errors and Warnings* for information on any error messages that appear during setting or removal of program protection.

4-4 Clearing the ZEN Memory

This section describes how to clear the ZEN memory from the ZEN Support Software. The ZEN must be connected and online to perform this operation.

ZEN memory data	Status after memory cleared
Ladder programs (including parameter settings information)	Ladder program code is completely cleared. No ladder programming will remain.
Password settings	The password will be cleared and program protection removed.
I/O bits	All inputs will be reset (turned OFF) and holding timer and counter present values cleared to 0.

1,2,3... 1. Select ZEN(Z)/All Clear within ZEN from the Menu Bar.

2. Click the **OK** Button to clear all memory in the ZEN. Click the **Cancel** Button to cancel the all clear operation.

4-5 RS-485 Communications Settings

The ZEN-10C4 R-U-V2 is equipped with an RS-485 communications output, supporting external communications using the CompoWay/F communications protocol.

- 1,2,3...Select ZEN(Z)/Set Protection(E)/Settings(S) from the Menu Bar.
 - 2. The Settings Dialog Box will be displayed. Click the **RS-485** Button.
 - 3. The RS-485 Communications Settings Dialog Box will be displayed. Set each item.

Data Length	Stop Bits	OK
7 💌 bit	2 💌 bit	Cancel
Parity Even	Baud Rate	Initialization
Node No.		Help
1		

Settings	Details	Default
Data Length	7 or 8 bits	7
Stop Bits	1 or 2 bits	2
Parity	None, even, or odd	Even
Baud Rate	4800, 9600, or 19200 bps	9,600
Node No.	Specify a node number between 0 and 99.	1
	Supports broadcasting (node No.: XX).	

 To save the settings click the OK Button. To clear the settings click the Cancel Button. Click the Initialize Button to return the settings to the default values.

SECTION 5 Simulation Function

This section describes the simulation function and corresponding displays.

5-1	Starting and Stopping the Simulation Function	62
5-2	ZEN Image Display	63
5-3	Present Value List Display	65
5-4	Clock Display.	66

5-1 Starting and Stopping the Simulation Function

A ladder program created with the Support Software can be run by the Support Software without transferring it to the ZEN.

1,2,3...
 1. Display the ladder program for which operation is to be simulated and then click the Start/Stop Simulator Button on the Toolbar or select ZEN(Z)/Start/Stop Simulator from the Menu Bar.

- Note Set values can be changed during simulation. For details, refer to Changing Settings Online in *3-7 Monitoring Programs*.
- When the simulator is started, the background color will change to yellow and the RUN, STOP, ZEN Image Display, Present Value List Display, Clock Display, and Start/Stop Simulator Buttons on the Toolbar will be enabled. Also, depending on the content of the ladder program, the ZEN Image Window, the Present Value List Window, and the Clock Window will be opened.
- 3. <u>To start the simulation, click the **RUN** Button on the Toolbar.</u> To stop the simulation, click the **STOP** Button on the Toolbar.
- To stop the simulator, click the Start/Stop Simulator Button on the Toolbar or select ZEN(Z)/Start/Stop Simulator from the Menu Bar. The background color for the simulator view area will change back to white.

Toolbar Button Functions

RUN	Executes the ladder program.
STOP	Stops the ladder program execution.
ZEN Image Display	Specifies whether or not the ZEN Image Window will be displayed.

Section 5-2

	Present Value List Display	Specifies whether or not the Present Value List Window will be displayed.
0	Clock Display	Specifies whether or not the Clock Window will be displayed.
19	Start/Stop Simulator	Starts and stops the Simulator.

5-2 ZEN Image Display

CPU Unit and Expansion I/O Unit images are displayed according to the configuration in the property settings, and input switches and lamps are allocated to the I/O bits used in the ladder program.

Note To display or hide the ZEN Image Window, click the ZEN Image Display Button on the Toolbar.

Input switch specifications can be changed by right-clicking the input switch symbol.

Input Switch Symbols

Symbol	Input specifications	Operation
₽\	Momentary: NO condition	Normally OFF. ON only when left mouse button is held down.
7	Momentary: NC condition	Normally ON. OFF only when left mouse button is held down.

Symbol	Input specifications	Operation
\mathbf{Y}	Alternate: NO condition	Remains ON after being clicked. Remains OFF after being clicked again.
7	Alternate: NC condition	Remains OFF after being clicked. Remains ON after being clicked again.
Ţ	Analog input	Select when using I4/I5 as analog inputs with a DC-type CPU Unit.

With LCD-type CPU Units, operation buttons can be used by the simulator. Either momentary or alternate operation can be selected by right-clicking the operation button symbols.

Operation Button Symbols

Input specifications	Operation	
Momentary	Normally OFF. ON only when left mouse button is held down.	
Alternate	Remains ON after being clicked. Remains OFF after being clicked again.	

- External inputs can be turned ON and OFF by clicking the input symbols. When an external input is turned ON, the color of the connection line between the input symbol and the ZEN terminal changes to green.
- The results of ladder program processing can be checked by observing the status of lamp symbols connected to output terminals (RUN mode only).

Lamp Symbols

Symbol	Status
1	Output terminal OFF
O Þ	Output terminal ON

• When a display bit (D) is used in the ladder program, the display conditions are shown on the ZEN display (RUN mode only).

Display Bit (D) Function

Multiple display bits (D) can be executed simultaneously, and their display conditions monitored.

5-3 Present Value List Display

The present values for timers, holding timers, weekly timers, calendar timers, counters, analog comparators, comparators, and other programming elements used in the ladder program are displayed in list format.

Relay	SetValue	Present Value	Contact	
то	10Minute00Second	00Minute00Second	OFF	TRGOFF RESOFF
20	0030	0000	OFF	GNT:OFF DIROFF RES:OF

Note To specify whether or not the Present Value List Window is to be displayed, click the **Present Value List Display** Button on the Toolbar.

Present values can be changed by double-clicking on the Present Value Dialog Box.

Present Value(T0)			
Se 0 OMillis	ОК		
	Cancel		

5-4 Clock Display

When weekly timers or calendar timers are used in the ladder program, present dates and times can be simulated.

Clock				X
Date:	2001/09/17		*	Time Settings
Time:	15:13:30		* 	
[Upd	ate unit			
0	Second	 Date 		
0	Minute	C Mont	h	
0	Hour	C Year		

- Note 1. To specify whether or not the Clock Display Window is to be displayed, click the **Clock Display** Button on the Toolbar.
 - To set the date and time display styles, select Settings/Control Panel/Regional Settings from the Start Menu. Select Date to set a date style or Time to set a time style.

Setting the Clock Forward or Back

The present date and time can be set forward or back in whatever units are set (seconds/minutes/hour/day/month/year) by clicking the **Forward** or **Reverse** Buttons.

Changing the Present Time

The present time can be changed by clicking on **Time Setting** to open the Time Settings Dialog Box.

Time Settings		×
Date: 2001/09/17	•	ОК

SECTION 6 Troubleshooting

This section describes errors that may occur while using the ZEN Support Software and possible countermeasures.

6-1	Online Errors and Warnings	68
6-2	Program Check Errors and Warnings	69
6-3	Protect Setting and Clearing Errors	70

6-1 Online Errors and Warnings

Error messages: Messages indicating fatal errors

Message	Probable cause	Countermeasure
Communications Error has occurred.	No response to a command from the ZEN Support Software.	Check that the Computer Connecting Cable is connected properly to the ZEN and the computer serial port.
	Communications timed out.	Check that the communications settings match the connection configuration of the ZEN.
Failed to connect to ZEN. The connected ZEN type () does not match the project's	Online connection attempted while the ZEN system configuration and the ZEN model in the ZEN	Change the ZEN model in the property settings and the Expansion I/O Unit settings to match the system configuration of the ZEN to be connected online.
ZEN type (). Cannot continue.	Support Software property settings are not the same.	When only the Expansion I/O Unit configuration is different, the following warning message (bottom line) will be displayed.
Operation failed since ZEN is in RUN mode. STOP ZEN running.	Command executed from the ZEN Support Software while the ZEN is in RUN mode.	Change the ZEN to STOP mode and re- execute the command.
Operation failed since ZEN is protected. Release the protection.	Command executed from the ZEN Support Software while the ZEN is protected.	Remove the protection from the ZEN and re-execute the command.
Operation failed since LCD is operating. Restore the main screen of LCD.	Command executed from the ZEN Support Software while LCD operations being performed on the ZEN.	Return the LCD operations to the Main Screen and re-execute the command.
Error rung found in the program. Program transfer is cancelled.	There is an error in the program.	Refer to the probable causes and countermeasures for Program Check error messages.

Warning messages: Dialog boxes are displayed for determining processing. Follow the instructions given in the dialog boxes.

Messages

ZEN is in RUN mode; execution not possible. Change to STOP mode? Y/N

Return to RUN mode? Y/N

A circuit in the program generated a warning. Continue program transfer?

ZEN model in properties settings (****) does not match model being connected (****). Go online? Y/N (See note.)

Note This message is displayed when an attempt is made to go online with only the CPU Unit specified in the property settings in the Support Software, without having the Expansion I/O Unit connected. Select "Y" to connect, and transfer the program. This is supported for version 4.0 or higher.

6-2 Program Check Errors and Warnings

Error messages: Message indicating fatal errors
The Program Check Results Dialog Box will be displayed.

Appendix B Support Software Version Upgrades

The following table shows the relationship between the version and functions of the ZEN Support Software and the ZEN CPU Unit.

Date of revision	ZEN CPU Unit	ZEN Support Software
January 2002	System Software (See note 1.) The system software was upgraded to version 1.1. <u>Main Changes</u> The following display functions have been added to LCD-type CPU Units. • Clear display function • The display object DAT1 (day/month)	 <u>Changes Applicable from</u> <u>Version 2.0 (ZEN-SOFT01-V2)</u> Changed to handle additional display functions. Simulation function added. Improvements made to functions, operability, and display.
April 2003	System Software (See note 1.) The system software was upgraded to version 2.0. ("-V1" was added to the CPU Unit model number.) Main Changes (See note 2.) • The number of timers, counters, weekly timers, calendar timers, and display bits was increased from 8 to 16. The number of holding timers was increased from 4 to 8. • A 20-point CPU Unit was added to the lineup.	 <u>Changes Applicable from</u> <u>Version 3.0 (ZEN-SOFT01-V3)</u> Changed to handle the memory area expansion in "-V1" CPU Units. Changed to handle addition of 20-point CPU Units.
January 2006	 System Software (See note 1.) The system software was upgraded to version 3.0 ("-V2" was added to the CPU Unit model number.) Main Changes (See note 2.) Addition of multiple-day operation and pulse-output operation to the weekly timers Addition of twin time operation to the timers Addition of an 8-digit counter and 8-digit comparators Addition of models with communications (10-point models only) and economy CPU Units Addition of daylight saving time settings for Australia and New Zealand Deletion of contrast control 	Support for Version 4.0 or Higher (ZEN-SOFT01-V4) • Supports CPU Units with enhanced functionality (-V2) • Supports half-sized I/O Expansion I/O Units (-8E1) • When the type of the CPU Unit (the CPU Unit and Expansion I/O Unit configuration) is the same as that specified in the property settings of the Support Software, program transfer is possible even if Expansion I/ O Units are not connected.

- Note 1. "System software" is the software for processing the CPU Unit's program. With LCD-type CPU Units, the system software version can be read by selecting *Other/System information* from the menu. With "-V2" CPU Units, "V03.00" will be displayed as the system software version.
 - 2. Refer to page 15 for the memory area differences between versions.

Compatibility between Support Software and Data

Data	Version of the ZEN Support Software				
	Ver. 1.0	Ver. 1.1	Ver. 2.0	Ver. 3.0	Ver. 4.0 or 4.1
Data created with Ver. 1.0	Yes	Yes	Yes	Yes	Yes
Data created with Ver. 1.1	Yes	Yes	Yes	Yes	Yes
Data created with Ver. 2.0	No (See note.)	No (See note.)	Yes	Yes	Yes
Data created with Ver. 3.0	No (See note.)	No (See note.)	No (See note.)	Yes	Yes
Data created with Ver. 4.0 or 4.1	No (See note.)	No (See note.)	No (See note.)	No (See note.)	Yes

Note A message saying that it was not possible to read the file will be displayed if an attempt is made to read incompatible data.

Compatibility between the ZEN CPU Unit and the Support Software

Version of CPU	Version of the ZEN Support Software				
Unit (See note 1.)	Ver. 1.0	Ver. 1.1	Ver. 2.0	Ver. 3.0	Ver. 4.0 or 4.1
Ver. 1.0	Yes	Yes	Partial (See note 2.)	Partial (See note 2.)	Partial (See note 2.)
Ver. 1.1	Partial (See note 3.)	Partial (See note 3.)	Yes	Yes	Yes
Ver. 2.0 ("-V1" CPU Units)	Partial (See notes 3 and 4.)	Partial (See notes 3 and 4.)	Partial (See notes 3 and 4.)	Yes	Yes
Ver. 3.0 ("-V2" CPU Units)	No	No	No	No	Yes

- Note 1. With LCD-type CPU Units, the system software version can be read by selecting *Other/System information* from the menu. With "-V2" CPU Units, "V03.00" will be displayed as the system software version.
 - 2. The setting for a display bit (D) will appear as follows:
 - If "DAT1: day/month" is set for display, the LCD display will show T#
 and the display function will not operate.
 - If "C (clear)" is set, the LCD display will appear as
 - [--| |-----0D0] and the display function will not operate.

Note The above operations were not supported in ZEN versions prior to 1.1.

- 3. When reading out the program from the ZEN, the following items will be determined based on the display function (D) settings contained in the program.
 - If "DAT1: day/month" is set, CHR (character designation) will be set.
 - If "C (clear)" is set, the display function (D) will be deleted from the program.

Note The above operations were not supported by ZEN Support Software versions lower than 2.0.

4. Cannot be used with 20-point CPU Units.

Restricted to use within the memory area range of Pre-V1 CPU Units.

Terms and Conditions of Sale

- Offer: Acceptance. These terms and conditions (these "Terms") are deemed part of all quotes, agreements, purchase orders, acknowledgments, price lists, catalogs, manuals, brochures and other documents, whether electronic or in writing, relating to the sale of products or services (collectively, the "<u>Products</u>") by Omron Electronics LLC and its subsidiary companies ("<u>Omron</u>"). Omron objects to any terms or conditions proposed in Buyer's purchase_order or other documents which are inconsistent with, or in addition to, these Terms
- Prices: Payment Terms. All prices stated are current, subject to change with-out notice by Omron. Omron reserves the right to increase or decrease prices 2. on any unshipped portions of outstanding orders. Payments for Products are due net 30 days unless otherwise stated in the invoice.
- biscounts. Cash discounts, if any, will apply only on the net amount of invoices sent to Buyer after deducting transportation charges, taxes and duties, and will be allowed only if (i) the invoice is paid according to Omron's payment terms З.
- and (ii) Buyer has no past due amounts. Interest. Omron, at its option, may charge Buyer 1-1/2% interest per month or the maximum legal rate, whichever is less, on any balance not paid within the 4 stated terms
- Orders. Omron will accept no order less than \$200 net billing.
- Governmental Approvals. Buyer shall be responsible for, and shall bear all 6 costs involved in, obtaining any government approvals required for the impor-tation or sale of the Products.
- Taxes. All taxes, duties and other governmental charges (other than general real property and income taxes), including any interest or penalties thereon, imposed directly or indirectly on Omron or required to be collected directly or 7. indirectly by Omron for the manufacture, production, sale, delivery, importa-tion, consumption or use of the Products sold hereunder (including customs duties and sales, excise, use, turnover and license taxes) shall be charged to and remitted by Buyer to Omron.
- Financial. If the financial position of Buyer at any time becomes unsatisfactory 8. to Omron, Omron reserves the right to stop shipments or require satisfactory security or payment in advance. If Buyer fails to make payment or otherwise comply with these Terms or any related agreement, Omron may (without liabil-ity and in addition to other remedies) cancel any unshipped portion of Prod-ucts sold hereunder and stop any Products in transit until Buyer pays all amounts, including amounts payable hereunder, whether or not then due, which are owing to it by Buyer. Buyer shall in any event remain liable for all unpaid accounts.
- Cancellation; Etc. Orders are not subject to rescheduling or cancellation unless Buyer indemnifies Omron against all related costs or expenses.
- 10. Force Majeure. Omron shall not be liable for any delay or failure in delivery resulting from causes beyond its control, including earthquakes, fires, floods, strikes or other labor disputes, shortage of labor or materials, accidents to machinery, acts of sabotage, riots, delay in or lack of transportation or the requirements of any government authority.
- <u>Shipping: Delivery</u> Unless otherwise expressly agreed in writing by Omron:
 a. Shipments shall be by a carrier selected by Omron; Omron will not drop ship except in "break down" situations.
 - b. Such carrier shall act as the agent of Buyer and delivery to such carrier shall constitute delivery to Buyer, c. All sales and shipments of Products shall be FOB shipping point (unless oth-
 - erwise stated in writing by Omron), at which point title and risk of loss shall pass from Omron to Buyer; provided that Omron shall retain a security interest in the Products until the full purchase price is paid; d. Delivery and shipping dates are estimates only; and e. Omron will package Products as it deems proper for protection against nor-
- and handling and extra charges apply to special conditions.
 <u>Claims</u>. Any claim by Buyer against Omron for shortage or damage to the Products occurring before delivery to the carrier must be presented in writing to Omron within 30 days of receipt of shipment and include the original trans-portation bill signed by the carrier noting that the carrier received the Products from Omron in the candition claims of the products of the product of the products of the product of the from Omron in the condition claimed.
- Warranties. (a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed 13 (b) <u>Limitations</u>. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABIL-

Certain Precautions on Specifications and Use

- Suitability of Use. Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, 1. Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases but the following is a non-exhaustive list of applications for which particular attention must be given: Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this document.

 (ii) Use in consumer products or any use in significant quantities.
 (iii) Energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equip-(iv) Systems, machines and equipment that could present a risk to life or prop-erty. Please know and observe all prohibitions of use applicable to this Product

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO

ITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. Omron further disclaims all warranties and responsibility of IN ISNDED USE. Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or oth-erwise of any intellectual property right. (c) <u>Buyer Remedy</u>. Omron's sole obli-gation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsi-ble for warapty consisting the non-the complex of the non-complying Product the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Compa-nies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty See http://oeweb.omron.com or contact your Omron representative for published information

- Iished information.
 Limitation on Liability: Etc. OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY. Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.
 Indemnities. Buyer shall indemnify and hold harmless Omron Companies and their employees from and against all liabilities, losses, claims, costs and expenses (including attorney's fees and expenses) related to any claim inves-
- 15 expenses (including attorney's fees and expenses) related to any claim, inves-tigation, litigation or proceeding (whether or not Omron is a party) which arises or is alleged to arise from Buyer's acts or omissions under these Terms or in any way with respect to the Products. Without limiting the foregoing, Buyer (at its own expense) shall indemnify and hold harmless Omron and defend or setthe any action brought against such Companies to the extent based on a claim that any Product made to Buyer specifications infringed intellectual property
- Property: Confidentiality. Any intellectual property in the Products is the exclu-sive property; Confidentiality. Any intellectual property in the Products is the exclu-sive property of Omron Companies and Buyer shall not attempt to duplicate it in any way without the written permission of Omron. Notwithstanding any charges to Buyer for engineering or tooling, all engineering and tooling shall remain the exclusive property of Omron. All information and materials supplied 16 by Omron to Buyer relating to the Products are confidential and proprietary, and Buyer shall limit distribution thereof to its trusted employees and strictly
- Export Controls. Buyer shall comply with all applicable laws, regulations and licenses regarding (i) export of products or information; (iii) sale of products to 17 "forbidden" or other proscribed persons; and (ii) disclosure to non-citizens of regulated technology or information. <u>Miscellaneous</u>. (a) <u>Waiver</u>. No failure or delay by Omron in exercising any right
- 18 <u>Miscellaneous</u>. (a) <u>Waiver</u>. No failure or delay by Omron in exercising any right and no course of dealing between Buyer and Omron shall operate as a waiver of rights by Omron. (b) <u>Assignment</u>. Buyer may not assign its rights hereunder without Omron's written consent. (c) <u>Law</u>. These Terms are governed by the law of the jurisdiction of the home office of the Omron company from which Buyer is purchasing the Products (without regard to conflict of law princi-ples). (d) <u>Amendment</u>. These Terms constitute the entire agreement between Buyer and Omron relating to the Products, and no provision may be changed or waived unless in writing signed by the parties. (e) <u>Severability</u>. If any provi-sion hereof is rendered ineffective or invalid, such provision shall not invalidate any other provision. (f) <u>Setoff</u>. Buyer shall have no right to set off any amounts against the amount owing in respect of this invoice. (a) Definitions. As used against the amount owing in respect of this invoice. (g) <u>Definitions</u>. As used herein, "<u>including</u>" means "including without limitation"; and "<u>Omron Compa-nies" (or similar words) mean Omron Corporation and any direct or indirect</u> subsidiary or affiliate thereof.

ADDRESS THE RISKS, AND THAT THE OMRON'S PRODUCT IS PROP-ERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

- 2.
- Programmable Products. Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof. <u>Performance Data</u>. Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitabil-ity and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application require-ments. Actual performance is subject to the Omron's Warranty and Limitations of Limiting. 3. of Liability.
- <u>Change in Specifications</u>. Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our prac-4 or when significant construction changes are made. However, some specifica-tions of the Product may be changed without any notice. When in doubt, spe-cial part numbers may be changed without any notice. When in doubt, spe-cial part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to applicate the provident of the product provident specifications for
- Errors and Omissions. Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.
